

Integrated Care Management

One connection for all of your health and wellness needs

Integrated Care Management simplifies the way you access and receive support by providing real value in areas that have been proven to make a difference.

With pharmacists, nurses, mental health professionals, and health coaches working together in the same location, you do not have to make multiple phone calls or explain your situation to different people. Our focus is on you and your wellness journey.

When to contact your Integrated Care Management team:

- If you have been newly diagnosed with a health condition
- If you are being discharged from the hospital
- If you have questions about your healthcare decisions
- If you are interested in making lifestyle changes
- If you need access to educational and community resources
