

Integrated Care Management

EMI Health has partnered with Veridicus Care Management (VCM) to ensure that patients with complex medical needs receive care in the most cost-effective and timely manner. Our collaboration goes beyond coordinating with the patient, family, caregiver, and healthcare providers with the goal to improve the patient's overall health and well-being. Integrated care management is a comprehensive program helping patients take an active role in their care.

The Cost of Healthcare

- ◆80% of healthcare resources are used by 20% of the population.
- ◆5% of the population spends 17 times more than the average person
- ◆The five most expensive health conditions are:
 - ◆Heart disease
 - ◆Cancer
 - ◆Trauma
 - ◆Mental disorder
 - ◆Pulmonary disorder
- ◆Approximately 750,000 people a year are rushed to the ER due to adverse drug reactions
- ◆The cost of healthcare coverage has risen three times faster than wages in the United States.

Right Patient, Right Solution

- ◆Through predictive modeling, we are able to identify the right patients - those that have multiple disease states that are costly and are not compliant with standards of care
- ◆VCM has the right professionals on staff to intervene and deliver the right solution: clinical pharmacists, nurse case managers, and mental health professionals.
- ◆We intervene when the patient is most likely to benefit from the assistance - when discharged from the hospital, when newly diagnosed with a medical condition, or when struggling to comply with the doctor's recommendations or standards of care.
- ◆Patients enter the program through:
 - ◆Referral
 - ◆Voluntary outreach
 - ◆Identified by VCM and EMI Health
 - ◆Participation is voluntary

Veridicus Care Management

- ◆Through VCM, EMI Health offers management of these complex conditions:
 - ◆Asthma
 - ◆Behavioral health
 - ◆Cancer
 - ◆Congestive heart failure
 - ◆Chronic obstructive pulmonary disease
 - ◆Cerebral vascular accident/ stroke
 - ◆Diabetes
 - ◆Heart disease
 - ◆Hypertension
 - ◆Kidney disease
 - ◆Obesity
 - ◆Pain management
 - ◆Prenatal - high-risk pregnancy
- ◆The VCM management team includes
 - ◆Registered nurses
 - ◆Clinical pharmacists
 - ◆Social workers
- ◆Why is this different?
 - ◆Collaboration of care under one roof
 - ◆Communication with the Primary Care Provider
 - ◆Patient-centered service
