

Expanded online services at emihealth.com!

Single Sign-on

To streamline your online experience, we have implemented Single Sign-on (SSO) capability. You now have access to many of the websites used to administer your benefits with one username and password. We will continue to work with other partners to bring on additional member websites in the future.

Smart Cost Calculator

Now you can get a cost estimate before you go to the doctor, hospital, or pharmacy with EMI Health's Smart Cost Calculator tool. While you're there, sign up to receive email or text alerts about available savings for the services and prescriptions you use. Then visit Healthcare University to learn healthcare basics that can help you become a better healthcare consumer through games, videos, and quizzes.

EMI TeleMed

Now you can consult with a doctor 24/7 365 days of the year. EMI TeleMed gives you access to WellVia's U.S. board-certified doctors over the phone or online video anytime, anywhere. Nearly 70 percent of all office visits and 40 percent of urgent care visits can be managed using EMI TeleMed at little or no cost to you.

Mobile Provider Search App

Download the EMI Health provider search mobile app for easy access to a list of participating medical, dental, and vision providers. Search options include provider name, specialty, city, county, state, zip code, and language spoken. Once you find a provider, you can call the provider's office, get directions (including a map), save the provider to your Contacts, or email the contact information to someone else.

Manage your benefits

Of course, as always, you can manage your benefits through My EMI Health. View benefits descriptions, review enrollment, check claims, order ID cards, price medications, refill prescriptions, and much more.
