***EMI Health earns ENERGY STAR certification***

---

EMI Health's new headquarters building outperforms similar U.S. buildings on measure of energy efficiency

MURRAY—October 1, 2019—EMI Health's headquarters building in Murray, Utah has earned the U.S. Environmental Protection Agency's (EPA) ENERGY STAR® certification for superior energy performance.

"Improving the energy efficiency of our nation's buildings is critical to protecting our environment," said Jean Lupinacci, Chief of the ENERGY STAR Commercial & Industrial Branch. "From the boiler room to the board room, organizations are leading the way by making their buildings more efficient and earning EPA's ENERGY STAR certification."

ENERGY STAR certified buildings and plants are verified to perform in the top 25 percent of buildings nationwide, based on weather-normalized source energy use that takes into account occupancy, hours of operation, and other key metrics. ENERGY STAR is the only energy efficiency certification in the United States that is based on actual, verified energy performance.

"We're honored to earn the ENERGY STAR for superior energy performance and appreciate the efforts of everyone involved," said Mike Greenhalgh, Chief Financial Officer of EMI Health. "Saving energy is just one of the ways we contribute to our community. As a health insurance company, we are committed to doing our part to protect the environment and public health."

Greenhalgh credits this success to the building's state-of-the-art high efficiency mechanical system, high performance coated glass on the exterior of the building, high-density urethane foam insulation, automatically dimming lights and occupancy sensors, and charging stations for electric vehicles.

On average, ENERGY STAR certified buildings and plants use 35 percent less energy, cause 35 percent fewer greenhouse gas emissions, and are less expensive to operate than their peers—all without sacrifices in performance or comfort.

For more information about ENERGY STAR for Buildings and Plants, visit [www.energystar.gov/buildings](http://www.energystar.gov/buildings).

### **About EMI Health**

EMI Health is a nonprofit organization providing health benefits to more than 280,000 members across the country. The company has been serving the needs of employers in the Intermountain West for more than 80 years by maximizing health benefits while keeping premiums at a minimum.
